

## Software Engineer - Computer Vision / Deep Learning

Who we are:

latAI GmbH is an R&D company based in Munich that develops novel process monitoring systems, prototypes and products using technologies such as Deep Learning, Computer Vision, Rapid Prototyping and IoT.

We are a young, highly motivated and very flexible team of software developers, mechanical and electrical engineers and work in a very central office in the middle of Maxvorstadt.

your job:

- Developing CV and DL based solutions
- Building prototypes and products from start to finish
- Evaluate different deep learning and CV algorithms and integrate them into the project
- Documenting the process and the final results

your profile:

- Very good knowledge in python and / or C++
- Experience with Tensorflow / OpenCV / Cuda
- Deep understanding of DL optimization methods and classical CV techniques
- Clean Github skills
- Friendly and outgoing personality
